| • Data Quality Management | • Relational Database Concepts |
| | • Git/GitHub |
| | • Stakeholder Communication |

PROJECTS

NHS England A&E Performance Analysis | Excel | MySQL | Power BI

Apr – May 2026

- Reviewed and analysed 3 years of complex government data across 122 Trusts and 47 million patient visits identifying recurring themes, trends, and systemic areas for improvement
- Investigated root causes of performance failures, distinguishing one-off issues from chronic recurring problems across the network
- Documented findings clearly and produced structured reporting for non-technical stakeholder audiences communicating complex trends in a digestible format
- Key finding: Not one Trust met the 95% target nearly 20 million patients waited beyond the constitutional standard across 2022 - 25

Telco Customer Churn Analysis - Financial Risk Analysis & Forecasting | Excel | MySQL | Python | Power BI

Feb – Mar 2026

- Reviewed and analysed customer interaction data across 7,032 records identifying recurring themes, complaint drivers, and service quality issues across contract types and payment methods
- Identified root causes of churn and service failure, translating findings into actionable process improvement recommendations projected to recover \$2M annually
- Produced structured trend reports and KPI dashboards communicating findings clearly to senior stakeholders

Loan Default Prediction & Approval Analysis | Excel | MySQL | Python | Power BI Jan – Feb 2026

- Reviewed 614 application records to identify patterns, anomalies, and recurring themes in approval and default behaviour
- Investigated root causes of default risk, developing a structured three-tier investigation framework (Approve/Review/Reject) projected to reduce \$750K in annual losses
- Produced clear reporting and stakeholder-ready dashboards summarising investigation findings and recommendations

EXPERIENCE

Online Customer Service Colleague | Asda, UK |

Oct 2024 – Present

- Manage high volumes of customer interactions daily in a fast-paced, customer-facing environment demonstrating communication, problem-solving, and the ability to work accurately under pressure
- Collaborate across operational teams to resolve customer issues efficiently, building strong working relationships and contributing to a high standard of service delivery

Assistant Data Analyst (6 months Contract) | Techdrive Consulting Limited | Aug 2024 – Mar 2026

- Supported data extraction, cleaning, and preparation activities across multiple client programmes following defined processes to ensure data quality and accuracy of reporting outputs
- Maintained project documentation and reference files, contributing to team knowledge sharing and continuous improvement initiatives
- Participated in stakeholder communications, presenting analytical findings clearly to both technical and non-technical audiences

Data Analytics Consultant (Virtual Experience) Deloitte

Dec 2025 – Apr 2026

- Analysed factory telemetry data across 4 global facilities; built Tableau dashboard identifying operational failure patterns for stakeholder reporting

Accountant | Sunday Asaba Oil & Gas |

Nov 2023 – Sep 2024

- Maintained financial data accuracy at 98% precision, demonstrating the high attention to detail and rigorous review standards required in QA and complaints analysis
- Produced monthly management reports in Excel, translating complex data into clear summaries for senior decision-makers
