PROFESSIONAL SUMMARY

In my current role as a Business Analyst at TechDrive Limited, working closely with internal and external stakeholders to analyse business structure, elicit and document requirements, model business processes, identify problems and formulate improvement recommendations, and oversee the implementation of new technology and systems using Agile methodologies has been central to daily delivery. With over a year of professional experience acting as a bridge between business stakeholders and IM&T translating business problems and change initiatives into technical requirements, producing Epics, User Stories and Prioritised Requirements Lists, and participating in Agile ceremonies including Scrum this application is grounded in directly relevant business analysis expertise and a genuine passion for improving the way organisations operate through intelligent use of data and technology. A First-Class Honours Accounting graduate with strong experience in data modelling, requirements engineering, process improvement, and stakeholder management.

TECHNICAL SKILLS

Business Analysis: Requirements elicitation and engineering, stakeholder management, business process analysis and modelling, AS-IS/TO-BE mapping, Gap Analysis, MoSCoW prioritisation, User Stories, Epics, Acceptance Criteria, Business Requirements Documents, RAIDS log

Agile & Methodologies: Agile, Scrum, Waterfall, SDLC, Sprint planning, Agile ceremonies, backlog management, process improvement, continuous improvement, Lean principles

Data & Analytics: SQL (MySQL, SQL Server DDL, DML, DQL, DCL, Window functions), Power BI (DAX, Data Modelling), Advanced Excel (VBA, Macros, PivotTables, Power Query, complex formulae), Python (Pandas, NumPy)

Tools: Microsoft Visio, Azure DevOps, Jira, Confluence, MS Project, SharePoint, Jupyter Notebooks, Git/GitHub

Healthcare: NHS data standards, NHSE protocols, information governance, GDPR compliance, patient-level data handling, data quality management

Stakeholder Management: Workshop facilitation, requirements gathering, cross-functional collaboration, senior stakeholder communication, change management support

EXPERIENCE

Data Analyst | TechDrive Limited, UK

2025 – Present

IM&T Consulting · Hybrid

- Analysing the structure of client businesses, how they use technology and what their goals are undertaking relevant problem-solving and investigation leading to recommendations that improve operational efficiency and business performance
- Conducting requirement elicitation using Agile methodologies producing Prioritised Requirements Lists, Epics, User Stories and Acceptance Criteria, and participating in Scrum ceremonies including sprint planning, retrospectives and stand-ups to support delivery of business change initiatives
- Undertaking process improvement activity performing AS-IS and TO-BE process mapping, conducting Gap Analysis, and formulating ways for businesses to improve based on previous research, achieving a 20% reduction in operating costs across client programmes
- Working closely with third-party technology providers overseeing implementation of new systems, managing data migration from on-premises to Azure cloud platform using Agile and Waterfall methodologies, and ensuring GDPR compliance and information governance throughout
- Identifying problems within the business using data modelling techniques capturing requirements accurately and effectively, translating business strategy and KPIs into specific, tangible business improvement activities that delivered a 25% improvement in decision-making efficiency
- Running workshops and training sessions coaching junior analysts and career switchers on data tools, SQL, and business analysis methodologies, sharing knowledge and driving continuous improvement across delivery teams
- Communicating with senior stakeholders to understand what they want to achieve deploying appropriate methodologies from the BA toolkit including MoSCoW prioritisation, user journey mapping, and workshop facilitation to elicit and document requirements effectively

- Producing relevant documentation including Business Requirements Documents, process flow diagrams using Visio, RAIDS logs, and technical specifications ensuring deliverables are of the desired content, suitability and quality

Junior Business Analyst | Sunday Asaba Oil & Gas |
Financial Services · On-site

2022 - 2024

- Analysed business processes and financial data to identify problems and formulate improvement recommendations achieving an 18% reduction in data-related errors and a 30% improvement in data retrieval speed through process improvement and SQL optimisation
- Maintained financial data accuracy at 98% precision applying rigorous data quality and governance standards, demonstrating the quality-focused, detail-oriented approach central to business analysis delivery
- Produced clear, concise reports and management information for senior leadership translating complex data findings into accessible insight and communicating effectively with stakeholders at all levels

KEY ANALYTICS PROJECTS

NHS England A&E Performance Analysis

| Excel | MySQL | Power BI

Direct Healthcare Experience 124 NHS Trusts · 47 million patient visits

- Analysed the structure and performance of NHS healthcare services identifying systemic business problems across 124 Trusts and 47 million patient visits using official government data and translating findings into evidence-based recommendations
- Applied data modelling techniques and process analysis writing 10 SQL queries, building a 3-page interactive Power BI dashboard, and producing structured reporting that communicated complex findings clearly to non-technical audiences
- Key finding: Not one Trust met the 95% four-hour constitutional target nearly 20 million patients waited beyond the standard across 2022–25; directly relevant to Connect Health's healthcare improvement mission

Telco Customer Churn Business Process Improvement & Requirements Analysis | Feb–Mar 2026

Excel | MySQL | Python | Power BI

- Identified business problems within a 7,032-customer dataset conducting root cause analysis, modelling the as-is process, and formulating improvement recommendations projected to recover \$2M annually
- Translated business strategy and KPIs into specific improvement activities delivering Power BI dashboard and structured business case recommendations to senior stakeholders

Loan Default Prediction Requirements Engineering & Solution Design | Jan–Feb 2026

Excel | MySQL | Python | Power BI

- Elicited requirements and designed a structured three-tier automated decision solution (Approve/Review/Reject) applying data modelling techniques and process improvement methodologies to deliver a framework projected to reduce \$750K in annual losses

EDUCATION & CERTIFICATIONS

Certifications: Advance Data Analytical Bootcamp

BSc Accounting - First Class Honours | University of Sunderland |

2024 – 2025

Actively developing BCS Business Analysis certification, aligned with Connect Health's essential qualification requirement

Continuous self-development in Agile, Scrum, process improvement, Azure DevOps, and healthcare IM&T environments
